

## **GEC Senior Expert Call - 2022**

Do you care about the future and are you fascinated by sustainability and innovation? Then you should get close to the GEC start-up scene and its innovative potential!

The Global Entrepreneurship Centre (GEC) is the first global scale-up centre focusing on deep tech start-ups with a proven positive impact on sustainability, climate neutrality and circularity. The Global Entrepreneurship Centre supports entrepreneurs to catalyze the transition to a sustainable world in line with the SDGs and Climate Goals, by scaling innovative companies that deploy cutting-edge and disruptive technologies, processes and business models that have the potential to substantially contribute to the achievement of the above named goals adopted by the world community in 2015.

The GEC is excited to announce that we are seeking Senior Experts for our unique GEC Expert Program, designed to provide guidance for entrepreneurs and start-up teams in different GEC service areas. The time commitment is dependent on the individual GEC Program.

We invite professionals from the GEC focal areas Textile, Agriculture & Food, Mobility & Transport, Building & Living to share their expertise with young leaders shaping the world of tomorrow's impact entrepreneurs.

### **The GEC Programs and Senior Expert Areas:**

| <b>GEC Campus</b>  | <b>GEC Catalyst</b>   | <b>GEC Factory</b>   |
